

KARBY KO1147

DESCRIPTION

The rectangular or circular keychain made of bamboo with a metal finish is an elegant and sustainable accessory to carry your keys in style. The bamboo used in its manufacture is a natural and renewable material, known for its resistance. The rectangular or circular design of the keychain offers a classic and timeless shape, while the metal finish adds a touch of sophistication. The contrast between bamboo and metal creates a harmonious and striking combination. In addition to its aesthetic appeal, the keychain is functional and durable. The metal ring allows you to hook your keys on securely, preventing them from getting lost. The compact size of the key ring makes it easy to carry in your pocket, purse or hooked on the belt loop of your trousers.
