

WESTON NA1250

DESCRIPTION

The multipurpose stainless steel knife with wooden handle is a versatile and practical tool that gives you several functions in one device. This knife is designed with high quality and durability, and its wooden handle gives it an elegant and natural look. The knife has three main functions: 1. Knife: The sharp stainless steel blade allows you to make precise and efficient cuts in various situations. It is ideal for outdoor activities, such as camping, hiking or doing DIY. 2. Scissors: Built-in scissors are ideal for trimming threads, paper or other materials in situations where you need a more precise and controlled cut. They are especially useful in crafting tasks or for quick repairs. 3. File: The file has a rough surface that allows you to file or polish rough or uneven surfaces. It can be useful for smoothing out sharp edges or wearing away small imperfections in materials such as metal or plastic.
