

KASIM PB1080

DESCRIPTION

The external wheat fibre and bamboo battery is an eco-friendly and practical option for charging your mobile devices on the go. With its 5000 mAh capacity, this battery provides the power needed to keep your devices running when you need it most. The wheat fibre and bamboo casing gives this battery a natural and sustainable look. It is an environmentally friendly alternative to conventional plastic batteries. The battery has an LED charge indicator, which allows you to easily see the remaining charge level. This way you can know when it's time to recharge and make sure it's always ready to use. With a DC5V/2.1A current output, this external battery provides you with fast and efficient charging for your devices. You can charge your smartphone, tablet or other compatible devices quickly and conveniently. The external battery includes a Type-C cable, which provides you with a universal connection to charge your devices. You won't have to worry about carrying extra cables, as this cable covers your charging needs. The product is presented in an eco-design box, reinforcing its commitment to sustainability and care for the environment. It is a perfect choice for those looking for products that combine functionality and environmental responsibility.
