

# NIKOL UM1159

## DESCRIPTION

An umbrella made of RPET (recycled polyester) with 190T pongee fabric and finished in reflective bands is a durable and sustainable option to protect you from the rain. The pongee 190T fabric is durable and water-repellent, ensuring good protection against rain. Reflective bands add a safety element as they reflect light and increase visibility in low-light conditions. Fibreglass rods with an anti-wind system offer greater resistance and flexibility in wind gusts, preventing the umbrella from being easily damaged. In addition, the umbrella has an automatic opening button for easy use and a Velcro closure for safe storage. Includes a matching cover to store the umbrella when not in use, keeping it protected and tidy. Being made of RPET, this umbrella contributes to the reduction of waste by using recycled materials in its manufacture.

## ADDITIONAL INFO

Material: RPET.
